

Nottawasaga & Creemore Public School – Board Games

<p>1</p> 	<p>The players are two royal builders competing to build their castle first. Each player in turn places a wall of his color. When a player manages to form a square with three or more sides of his color, he places a castle inside. The first player to place all five castles wins.</p> <p>From the box: Once upon a time there were 2 royal master-builders. They were competing for the favors of the beautiful queen. Which of them will be the first to finish a new castle for her majesty?</p> <p>Content: 5 green towers (2 with roof (sic), 3 without roof), 5 yellow towers (2 with roof, 3 without roof), 15 green walls, 15 yellow walls</p> <p>For 2 players. <u>From 4 years of age.</u></p>
<p>2</p> 	<p>It's simply a matter of DIVIDE and CONQUER!</p> <p>If we divide correctly, we earn the right to conquer those chips. And whoever has the most chips after 5 rounds of play. . WINS THE GAME!</p> <p>Now with the roll of all 3 dice you'll then simply call out the division for each one of the numbers rolled into the teal colored numbers showing on the tile. With the number 27 showing on a tile in the center pile and having rolled a 3, you will simply call out "27 divided by 3 equals 9" and the chip is YOURS. It's that simple.</p>
<p>3</p> 	<p>ROLL 'EM & WIN!</p> <p>It takes SPEED, because you have ONLY two 30 second rounds to roll the multiples of your number (1-9), call out the multiplications and cover the answers found on your number board.</p> <p>ROLL 'EM & WEEP!</p> <p>It takes LUCK, because in rolling three GOOSE EGGS (0,0,0) you are EGGED right out of the game!</p> <p>The game SCRAMBLED EGGS, found on the backside of each number board, and is designed for those who want to bolster their multiplication skills. Again with the two dice, two 30 second rounds, players will either be covering up their answers on the bottom row, or advancing their markers upwards to adjoining open answers to get to the top of the pile.</p>

<p>4</p>  <p>The image shows the box for 'KID-CALA', a Mancala game for children. The box is colorful with a yellow background and features a cartoon banana character on the left. The title 'KID-CALA' is in large, bold, red letters. Below the title, it says 'The Mancala Game for Children (and Parents, Too!)'. There is also a small illustration of a purple grape character. The box shows a wooden board with several circular pits containing fruit pieces. Text on the box includes 'Ages 6 & Up' and '2 Players'. A small blue badge on the right says 'Played in classrooms nationwide!'.</p>	<p>Kidcala is a kids' version of Mancala, which has all the fun and strategy of the original game--but 3 new games for children. Kidcala's special design includes a family of fruits (grapes, oranges, apples, and bananas) for a new twist on the traditional African counting game.</p>
<p>5</p>  <p>The image shows the 'Slamwich' card game box, which is designed to look like a lunchbox. The box is orange and green with a red handle. The title 'Slamwich' is in large, red, stylized letters. Below the title, it says 'The Fast Flipping Card Game For 2-4 Players • Ages 8 & Up'. There is an illustration of a sandwich and a card. The box is shown next to a stack of cards and a single card with a sandwich illustration.</p>	<p>The game that started it all - with all new cards in a special collectable lunch box tin! Flip and stack this clever loaf of cards to build slamwiches and double deckers. Tomato, cheese, tomato... slap! Get there first and win the pile. But watch out -- you'll have to catch thieves and stop munchers from stealing the stack of cards. When you're out of cards, you're out of the game. The first player to collect all the cards wins.</p>
<p>6</p>  <p>The image shows the 'Noodlers' puzzle box. The box is colorful with a blue and green background. The title 'Noodlers' is in large, white, stylized letters. Below the title, it says '50 Spatial puzzles to noodle your noodle!'. There is an illustration of a puzzle board with a grid and a noodle. The box is shown next to a stack of puzzle pieces and a single puzzle piece.</p>	<p>Use your noodle and the included sticks to separate each symbol into its own space. The catch? The instructions tell you how many (or how few) sticks you get to use. Noodlers Puzzle Box is great for enhancing spatial learning. Includes 80 full-color puzzles and 6 Noodlers sticks.</p>
<p>7 & 8</p>  <p>The image shows the 'Pencoloo' game box. The box is blue and white with a yellow background. The title 'Pencoloo' is in large, orange, stylized letters. Below the title, it says 'THE FUN SOUTH POLE ESCAPEMENT!'. There is an illustration of penguins and a red egg. The box is shown next to a stack of cards and a single card with a penguin illustration.</p>	<p>Pengoloo is filled with matching and memory fun from the South Pole! Kids ages four and up are challenged to match coloured eggs hidden under each penguin, to the colours on the dice. Make a match to collect a penguin and place it on your iceberg scorecard. Be the first to collect six penguins to win the game. This charming wooden game is for 2 to 6 players.</p>
<p>9</p>  <p>The image shows the 'BrainBox Maths' game box. The box is green and white with a yellow background. The title 'BrainBox Maths' is in large, red, stylized letters. Below the title, it says 'THE FUN MATHS WHICH KNOWS!'. There is an illustration of a die and a stack of cards. The box is shown next to a stack of cards and a single card with a math problem illustration.</p>	<p>The object of the game is to study a card for 10 seconds and then answer a question based on the roll of a die. If the question is answered correctly, the card is kept, and the person with the most number of cards after 5 or 10 minutes is the winner.</p>

Hive is a highly addictive strategic game for two players that is not restricted by a board and can be played anywhere on any flat surface. Hive is made up of twenty two pieces, eleven black and eleven white, resembling a variety of creatures each with a unique way of moving.

With no setting up to do, the game begins when the first piece is placed down. As the subsequent pieces are placed this forms a pattern that becomes the playing surface (the pieces themselves become the board). Unlike other such games, the pieces are never eliminated and not all have to be played. The object of the game is to totally surround your opponent's queen, while at the same time trying to block your opponent from doing likewise to your queen. The player to totally surround his opponent's queen wins the game.

11

An all in one primer designed to help build important early math skills. This hands-on set starts with number recognition and counting tasks, then advances to simple addition/subtraction with objects and numbers, patterning, early problem solving and quantity comparisons. Hungry for fun? Gobblet Gobblers is an easy to learn strategy game with an irresistible cast of characters. Like Tic-Tac-Toe, players have to line up three of their Gobblers in a row to win. Here's the catch; you can gobble up your opponent's smaller pieces to steal their spot! Put on your thinking cap to outmaneuver your opponent and win the game.
